Professional Summary

Frontend Engineer with nearly 2 years of experience building production web applications using React.js, JavaScript, and Bootstrap, with hands-on experience integrating REST APIs, working exposure to MySQL, and backend integration, across Fintech and Healthcare domains. Core member of the delivery team — directly engage with clients to gather requirements and translate them into frontend architecture and UI logic. Own end-to-end deployment lifecycle: building both frontend and backend, and deploying via WinSCP with zero-downtime IIS releases, including on-site live production rollouts and daily deployment cycles. Optimized rendering performance using Redux Toolkit and Zustand, reducing unnecessary Virtual DOM re-renders. Converted Figma designs into responsive, pixel-accurate UIs; integrated third-party APIs (Google Maps, Razorpay).

Skills

- **Frontend Development:** React.js, Redux Toolkit, Zustand, Rest Api, Material UI, Bootstrap, HTML5, CSS3
- **Database & Deployment:** SQL/MySQL, IIS Server, WinSCP, Git, GitHub, GitLab, Zoho, Postman
- **Programming Languages:** JavaScript (ES6+), TypeScript, Java

Experience

IT Dose Info System

Dec 2025 – Present

Software Developer

Onsite

- Serve as a core member of the main delivery team, managing end-to-end frontend development for an enterprise Hospital Management System (HMS) using React.js, JavaScript, Bootstrap, HTML5, CSS3 and Redux across core modules.
- Handled asynchronous data fetching using JavaScript Promises and Redux to optimize REST API responses and improve component rendering performance.
- Integrated third-party service REST APIs including Google Maps API for hospital mapping and Razorpay payment gateway for patient billing transactions.
- Built reusable UI components with Bootstrap and CSS3, ensuring consistent styling and responsiveness across core HMS modules.

MingleLoans Fintech Private Limited

Nov 2024 – Dec 2025

Frontend Developer

Onsite

- Joined the project from scratch, spearheading client-side development for a cross-platform loan engine and translating complex Figma mockups into pixel-perfect, fully responsive mobile and tablet UIs using React.js, JavaScript, HTML5, CSS3 and Material UI.
- Engineered global state management with Zustand to manage complex multi-step loan application forms efficiently across user sessions, integrating with REST APIs.
- Applied DRY principles and clean code methodologies to reduce component footprint, resulting in optimized memory overhead and faster DOM rendering.
- Executed direct on-site client visits and deployments, collaborating with QA engineers via Zoho issue tracker to debug complex edge cases and ensure stable release cycles across continuous integration deployments.

Mantra Care

Sep 2024 – Oct 2024

Full Stack Development (Intern)

Delhi, India

- Developed interactive user features using the MERN stack while following Git branching strategies, enhancing overall user engagement and platform responsiveness.
- Standardized API response handlers and UI error boundaries to improve client-side fault tolerance during high traffic peaks.

Projects

Food Delivery App | *React.js, Express.js, Node.js, MongoDB*

- Engineered a full-stack platform featuring dynamic React components for real-time menu browsing, cart state synchronization, and order tracking.
- Implemented secure RESTful API endpoints utilizing Node.js and Express.js for JWT-based authentication and payment data processing, ensuring low-latency request handling.

Education

Graphic Era Hill University

2022 – 2024

Master of Computer Application (MCA)

Dehradun, Uttarakhand

Certifications

- * Certified in Machine Learning from Great Learning Academy
- * Certified in Java from IIT Bombay Spoken Tutorial
